Abstract

This project aims to identify the new IT jobs in Iran and to plan the IT skills' Curriculum for the first 50 jobs.

The results of the project includes more than 6500 pages in 53 volumes and 12 CDs. Six joural and conference papers have been extracted from the project, too.

The project is a part of the issues in the 4th National Development Plan and the National ICT Agenda of Iran (TAKFA) and helps the Ministry of Labour (Iran Training and Vocational Training organization) to support more than 12000 Training center around the country.

The results of the project have been extracted from comparative studies among 8 countries and by reviewing more than 700 documents (such as: Journals, papers, books, governmental reports and so on), so the plan can support the trainees to compete with other international specialists.
