Title: Outstanding research in mathematic

Researcher: Qaiser Mushtaq

Country: Pakistan

Field: Mathematic

Qaiser Mushtaq (born 28 February 1954), is a Pakistani mathematician and academic who has made numerous contributions in the field of Group theory and Semigroup.

Mushtaq is one of the leading mathematicians and educationists in Pakistan. Through his research and writings, he has exercised a profound influence on mathematics in Pakistan.

His research contributions in the fields of group theory and LA-semigroup theory have won him recognition at both national and international levels. he has laid the foundation of coset diagrams for the modular group", to study the actions of groups on various spaces and projective lines over Galois fields.
